ACCREDITED**

Cleveland Clinic has been ranked the nation's No. 1 heart care program for 23 consecutive years by *U.S. News & World Report*.

# Join us at Cleveland Clinic's 19th Annual Intensive Review of Cardiology

Dear Colleague,

You are expressly invited to attend the *19th Annual Intensive Review of Cardiology: Comprehensive Update and Advances*, August 18-22, 2018 at the InterContinental Hotel and Conference Center on the Cleveland Clinic main campus in Cleveland, Ohio.

This educational activity continues to be a wonderful forum to critically review current thinking and management of all the major cardiovascular disciplines. The focus will be on the delivery of contemporary medicine, including complex patient management and decision-making for practicing cardiologists. Cardiovascular board certification and re-certification examination candidates may also find this review useful.

Attendees will be able to earn ABIM Maintenance of Certification points as part of full course registration.

**You will find this symposium to be fun, clinically relevant, and stimulating.** Get engaged in integrated audience interaction with reviews of cases, images, and relevant data during the lectures.

**The comprehensive four-and a half day program will be memorable.** On Saturday, the top 10 Learning Points including all aspects of Cardiovascular Medicine will be covered. The review will highlight clinical evaluation and management of the patient encountered in daily practice. An update of current ACC/AHA guidelines that support treatment and management recommendations, as well as a review of controversies and dilemmas will answer any questions you may have.

Many other important topics and cases will be included. The Conference Center has exceptional amenities that enhance learning and comfort. As codirectors, we truly hope you will be able to join us in August for this exciting and memorable educational activity that impacts your clinical decision making.

Sincerely,

Samir Kapadia, MD, FACC  
Venu Menon, MD, FACC

## Who should attend?

Practicing cardiologists and cardiology fellows, physician assistants, nurses, advanced practice nurses, and mid-level practitioners seeking a comprehensive review of contemporary cardiovascular medicine will benefit from this Symposium.

## Intensive Review of Cardiology will help you:

- Summarize results from research studies investigating the biologic basis and pathophysiology of cardiovascular diseases (CVD)
- Analyze results from recent clinical trials for CVD and describe their potential impact on clinical practice
- Present safety and efficacy data on the new drugs, formulations, and indications for CVD and describe their implications for clinical care
- Describe the recent surgical innovations, including devices, techniques, and approaches for CVD
- Review new developments in CV imaging technologies and assess their potential use in clinical care
- Review recent evidence-based recommendations for CVD management strategies and assess their implications for clinical practice
